Power Associates

MAY 2021

PRESIDENT'S LETTER

Let me start by thanking Larry Madole for the use of his business yard to conduct our board meetings in an outdoor setting during the pandemic. With Cal Poly shut down we had nowhere to hold our meetings. Larry stepped up and offered his facility for our meetings. As with all things, it has come to an end now that Larry's business has picked up and he will not be able to host the meetings. Our next board meeting will be Saturday, May 8th at 9:00am, at Centennial Heritage Park, 725 E Mauna Loa Ave, Glendora. Cal Poly will start to open up in June, but we will need to see if they will allow group gatherings on campus.

My next big thank you goes out to our editor Jim Treadwell. Jim has graciously volunteered his time to publish the WAPA newsletter. Jim is doing a great job at publishing our great newsletter each month and we all need to thank him for that. I don't know if you realize it, but it does take some computer skills to publish a newsletter. Fitting articles and pictures onto a page in a fashion for easy reading. Great job, Jim, and keep up the good work!

At the time this newsletter reaches you, we should have participated in the 19th annual Corn Feed Run in Chino. Look for pictures in the next edition.

SAFETY NOTE

FROM TIMOTHY NEELY

393.128 What are the rules for securing automobiles and light machinery.

(a) Applicability. The rules in this section apply to the transportation of automobiles, light trucks, and vans which individually weigh 4,536 kg. (10,000 lb) or less. Vehicles which individually are heavier than 4,536 kg (10,000 lb) must be secured in accordance with the provisions of § 393.130 of this part.

(b) Securement of automobiles, light trucks, vans, and light machinery.

(1) Automobiles, light trucks, and vans must be restrained at both the front and rear to prevent lateral, forward, rearward, and vertical movement using a minimum of two tiedowns.

(2) Tiedowns that are designed to be affixed to the structure of the automobile, light truck, or van must use the mounting points on those vehicles that have been specifically designed for that purpose.

(3) Tiedowns that are designed to fit over or around the wheels of an automobile, light truck, or van must provide restraint in the lateral, longitudinal and vertical directions.

(4) Edge protectors are not required for synthetic webbing at points where the webbing comes in contact with the tires.
